

Technical Training Seminars

Join us in our Alsip, IL demonstration room where you will see 15 psi steam generated live and distributed through various glass piped steam traps, coils, etc. *You will actually see how steam works!*

Choose our **Steam Fundamentals Seminar** where we utilize glass piped demo boards to explain the behavior of steam, condensate, water and air. This seminar provides an optional .5 CEU's from an accredited institution of higher education. Affiliated Steam is providing this opportunity in partnership with Armstrong International and Michigan's Spring Arbor University. Discussion includes steam traps, steam coils, water heaters, heat exchangers, pressure reducing valves, and much more.

Or choose our **Hands On Steam Seminar** in which you will be tearing down and reassembling steam traps, pressure reducing valves and condensate pumps, and learning how to test steam traps and install repair kits.

| AFFILIATED STEAM • HOT WATER 2017-2018 SEMINAR SCHEDULE | |
